- If you're switching system to MATO1, MATO2 or MATO3 we can even buy the entire inventory in your yard.

**Gain by exchanging
and switching your
systems to Tobler systems**

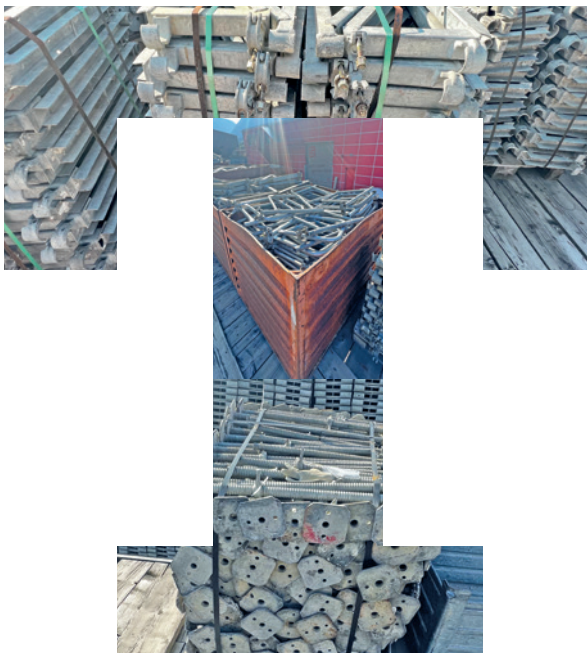

Easy and straightforward

We take care of everything.

- Frames, platforms, stairs, braces, scaffolding tubes, even small parts:

We will find a buyer, guaranteed!

We buy your old platforms

Scaffolding platforms from top manufacturers.

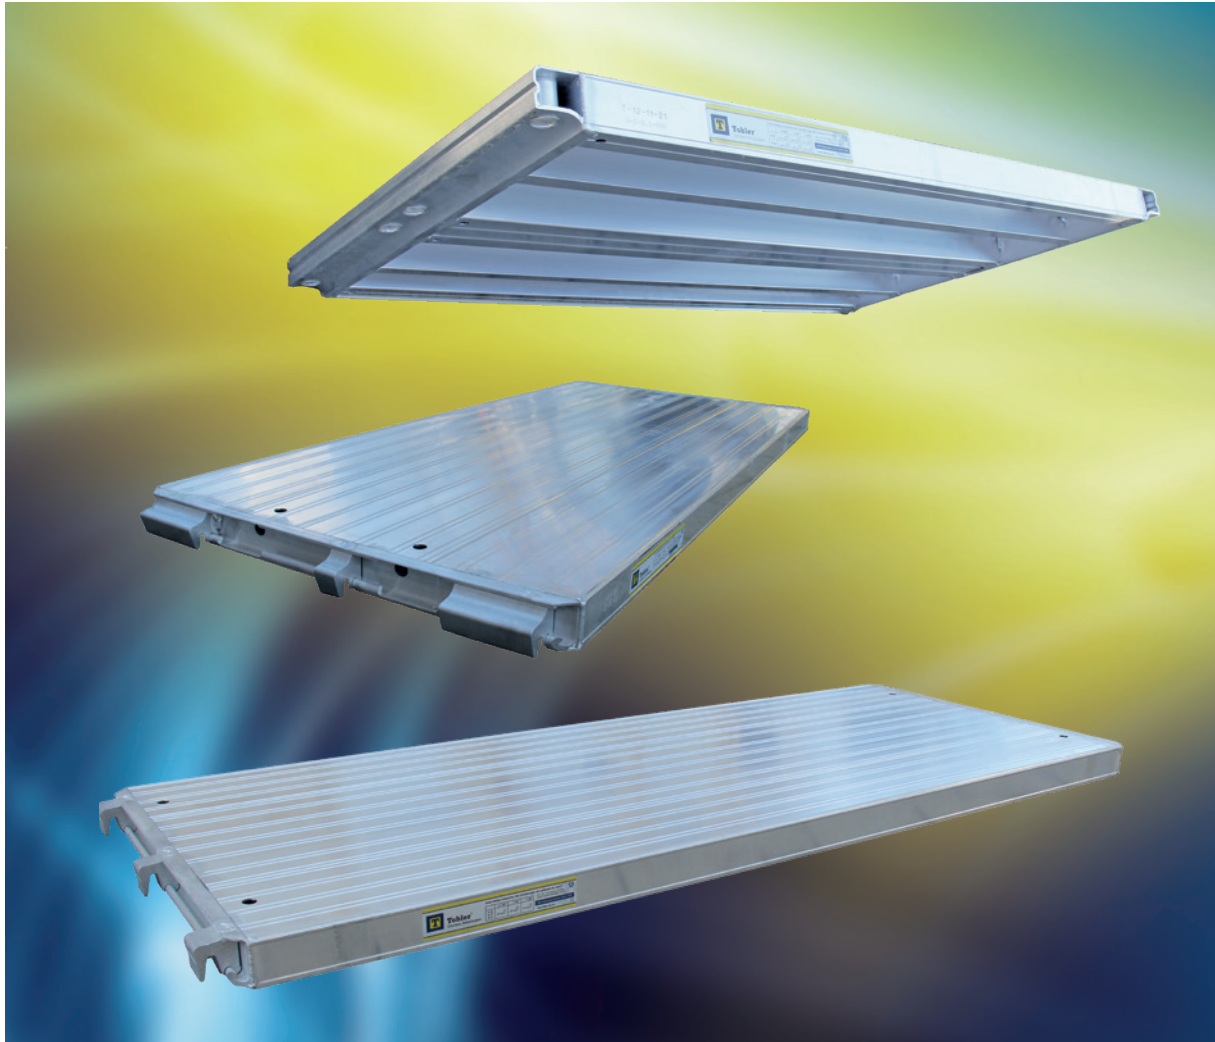

- We take care of collection
- There's lots to discover for your scaffolding at our warehouse locations
- Please get in touch, we take (almost) anything!

You receive new professional platforms

Compatible with your system.

- Lighter and easy to handle thanks to ergonomic design with integrated grip recesses
- Easier to carry and assemble
- Compatible with your system
- With DIBt approval
- Available in any length
- Largest horizontal bracing
- High load capacity

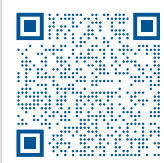

Want to work faster?

How about turbo-speed, lightweight MATO facade scaffolding?

MATO 1

The DIBt-certified MATO 1 scaffolding is available in steel and aluminium versions. Scaffolding frames, platforms, toe boards and a striking double guardrail can be erected and secured in seconds. You save 30% on labour costs with every assembly/disassembly.

- Maximum safety
EN 12810/12811
- DIBt certification no.
Z-8.1-937

The fastest scaffolding system

MATO 2

The core of the DIBt-certified system, available in both steel and aluminium, consists of rosettes that are vertically spaced at 50 cm intervals. They allow for connections in four directions. The system can be supplied and combined in widths of 95 cm or 65 cm.

The façade scaffolding with a modular scaffold function, which has expanded and been optimised over the years, is a pleasure to use, especially for roofers and metalworkers.

- Maximum safety
EN 12810/12811
- DIBt certification no.
Z-8.1-967

Want to be able to do everything?

The infinitely expandable MATO 3 all-in-one scaffolding.

MATO 3

The MATO3 scaffolding system, which is registered for DIBt certification, is the future of scaffolding erection and satisfies all current and future standards. MATO3 has a patent-pending, integrated leading railing and can be combined with the MATO8 modular scaffolding. It allows you to move from the main platform to the bracket platform gap-free, and does not need couplings.

WITHOUT COUPLING

GAP-FREE

MATO 8

The MATO 8 modular scaffolding with the practical wedge head coupling system for quick assembly and disassembly is available in steel and aluminum! MATO 8 can be used to realise complicated industrial structures, bridging elements, stairways, towers, mobile scaffolding, grandstands and much more. MATO 8, MATO 3, Road Bridge and Light Bridgebeam provide the perfect modular solution for all applications.

At home in Switzerland – anchored in Europe

We are developing the internationalisation of our product range.
