Tobler Care Renovation

Machine assisted cleaning of your formwork.

Our services

- Pre-cleaning of frames
- Pre-cleaning of formwork panels
- Mechanical cleaning of the surface
- Mechanical cleaning of edges
- Repair of formwork panels

Make a
Pit stop
at Tobler
after every
construction site

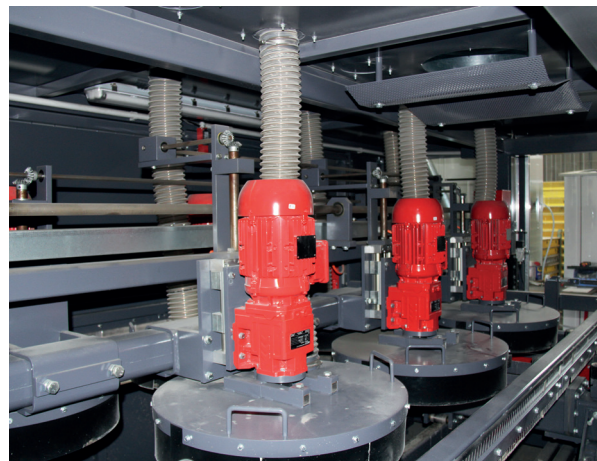

During pre-cleaning we make sure that every formwork is entering the cleaning system in correct position. In addition, any damage is recorded.

On each side, the edges of the formwork frames are cleaned simultaneously by 2 pairs of brushes. From above, no less than 6 large brushes take care of a perfect surface of the formwork skin.

In this way, a high throughput speed is achieved, as well as excellent cleaning results.

The completely cleaned formworks are ready for shipment or are waiting for their next use in the Tobler RENT rental park.
